

Soleus® Transit for Connected Personal Navigation Devices

Operating System SKUs

- ▶ Windows® Embedded CE 5
- ▶ Windows Embedded CE 6
- ▶ Microsoft® NavReady*

Built-in Connectivity

- ▶ Full featured telephony stack
- ▶ GPRS
- ▶ EDGE
- ▶ UMTS / HSDPA / HSUPA
- ▶ Bluetooth Dial Up Networking*
- ▶ Bluetooth Handsfree
- ▶ WiFi*
- ▶ Local search (major search providers)*

Reference Modem Driver Support

- ▶ Infineon ULC-2
- ▶ Siemens® MC55, MC75
- ▶ Sierra® Wireless MC8775V (Qualcomm 6280)
- ▶ TI OMAP 850

Phone Applications

- ▶ Voice calling
- ▶ SMS messaging
- ▶ Dialer
- ▶ Contacts
- ▶ Call history
- ▶ Network Manager*
- ▶ System settings

Navigation Optimization

- ▶ Customizable landscape UI
- ▶ Finger touch-enabled
- ▶ Choose Intrinsic's Destinator® option for best in class navigation
- ▶ Ready for other navigation software

Adding the Power of Telephony to PNDs

Soleus® Transit is designed specifically to support Personal Navigation Devices (PNDs) that have the full featured connectivity of the latest wireless handsets. The advantage of connectivity is the ability to differentiate your PND by providing you with new capabilities.

Soleus Transit

For example, you can update POIs over the air, view

live traffic information, or conduct local searches. Fully integrated telephony functionality also enables converged features such as emergency and roadside assistance calling, auto-dialing a searched business, navigating to a contact's address, or sending a location via SMS.

A Rapid PND Solution

Soleus Transit is a comprehensive software solution enabling you to rapidly bring a connected PND to market faster and at lower cost. Built on Windows Embedded CE, a popular OS choice for PNDs, Soleus Transit includes a pre-certified telephony stack and integrated phone software on a platform optimized for building navigation devices. Soleus Transit comes pre-integrated with Intrinsic's Destinator navigation software. Soleus Transit integrates with Microsoft Visual Studio and Platform Builder for a powerful, easy to use solution. Use the Soleus Adaptation Kit to adapt the platform to your chosen hardware or take advantage of our award-winning Solutions Engineering services for an end-to-end solution.

Soleus Transit + Destinator: A Great Value

While Soleus Transit is designed to support your preferred navigation software, it can also be purchased with a pre-integrated version of Destinator, navigation software. Destinator features the best routing engine in the industry, getting you to your destination by the shortest and quickest route. The elegantly simple, safe, and customizable UI provides users a number of viewing options, including day or night mode and 2D or 3D maps. There is also an audio interface that lets you hear turn-by-turn instructions while keeping your eyes on the road. Destinator is available in multiple languages with maps for many countries.

Destinator

The Center of Connected PND Possibilities

Soleus Transit is the starting point for many differentiated devices that combine navigation and telephony capabilities. Whether you want to create a dedicated traffic device or a converged device that also makes phone calls, plays music and shows movies, your project will progress faster with Soleus Transit. Intrinsic offers Soleus Transit combined with the Destinator navigation solution and Solutions Engineering teams to provide you with a low risk entry into the rapidly growing connected PND marketplace.

Soleus Transit: Getting to your destination

Intrinsic has a proven track record in the development of wireless consumer products, and has deep expertise with connected personal navigation devices. Designing and manufacturing a wireless device quickly and cost-effectively requires the seamless integration of software and hardware, with power management, telephony, UI, and thorough testing and certification.

Intrinsic has the resources and expertise that come from more than a decade of experience with hundreds of successful development projects. In addition to helping differentiate wireless devices and accelerate your time to market, Intrinsic offers end-to-end, turnkey development solutions. These include the integration, porting, and development of multimedia applications for wireless devices, as well as designing, debugging, optimizing, and certifying hardware.

Let Intrinsic help you bring your next device to market faster and at a lower cost with the Soleus Transit platform and expert engineering solutions tailored to meet your company's specific requirements. To learn more about Intrinsic, please visit our website at www.intrinsic.com or call **+1-800-474-7644**.

Destinator Navigation Software

- ▶ Vehicle or pedestrian mode
- ▶ Local search
- ▶ Auto dial
- ▶ Navigate to contacts
- ▶ Audio directions
- ▶ MSN Direct and Zagat content
- ▶ Content integration services

Soleus Converged Device Software

- ▶ Integrated upon request
- ▶ Media player and picture viewer
- ▶ Camera and video support
- ▶ Productivity suite: calendar, alarm, calculator, notes, voice memos
- ▶ 3rd party application catalog: games, browsers, MMS, IM, T9, handwriting

Intrinsic Solutions Engineering

- ▶ Expert integration services
- ▶ Predictive power management
- ▶ User interface design and tools

About Intrinsic

Intrinsic provides wireless software solutions that enable next-generation handheld products, including mobile handsets, smart phones, and converged devices. The company's software products include the Soleus® software platform for consumer device development and Destinator® GPS/navigation technologies. Combined with award winning engineering services and years of systems integration expertise, these solutions help device makers, service providers, and silicon vendors deliver compelling wireless products with faster time-to-market and improved development cost.
