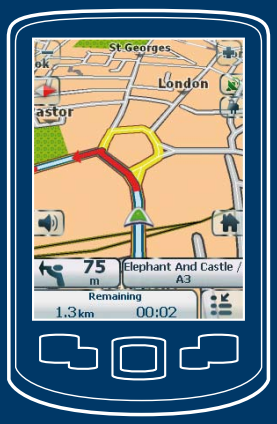
DestinAtor® 7



Personal Navigation System for Microsoft® Windows® based

PDAs

GETTING THERE HAS NEVER BEEN EASIER!

Destinator 7 is your best possible travelling companion – smart, quick and with an eye for detail that makes getting from A to B simple and trouble-free. With all the quality and reliability you have come to expect from our products, Destinator 7 provides you with a range of exciting new features, plus improvements in the underlying routing engine that really will make a difference to your journey.

Take a look at the new improved 3D display – it's clean, clear and uncluttered, providing you with the right level of essential travel information at all times. Or use our new extensive Points of Interest feature – now with wider search functionality and the ability to call ahead to your destination at the push of a button when connected to your mobile phone.
Additionally, Destinator 7 includes the most current maps, traffic information and improved voice guidance, including clear street name announcements (through text to speech technology).

Destinator 7 – beyond getting there.
